DETAILED ACTION

Request for Continued Examination

1 A request for continued examination (RCE) under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 06/11/04 has been entered. An action on the RCE follows.

Election/Restrictions

2. Newly amended claims 18 – 21 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: Claims 18 – 21 do not belong to the elected embodiment of Figure 3B.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 18 – 21 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 26 – 28 are rejected under 35 U.S.C. 102(e) as being anticipated by Shimomura (PN 6,352,920).

Shimomura discloses, as shown in Figure 3(c), a semiconductor device comprising:

a silicon substrate [Col. 3, lines 22-25];

a patterned dielectric layer (11) on the substrate;

a bulk metal layer (17) comprising copper and beryllium [Col. 5, lines 13-16].

With regard to claim 27, Shimomura discloses the metal layer is Cu alloy, therefore, it is inherent that the second metal is a finely dispersed solute rich phase [Col. 5, lines 13-16].

With regard to claim 28, Shimomura discloses the metal layer is Cu alloy, therefore, it is inherent that beryllium is part of a large grained precipitate [Col. 5, lines 13-16].

Response to Arguments

4. Applicant's arguments with respect to claim 26 have been considered but are moot in view of the new ground(s) of rejection.
